NSBP 260112 officer meeting Agenda

- February movie night
- Event ideas for the semester, particularly professional development and things for Kendall?
    - Also pick up this craft night idea again (paint & sip / zine making / something else)
- Thoughts on consistent general body meetings, 1 time a month (after every event for feedback and new ideas)? Or something more irregular (not sure who all would come)
- Lunch
    - Friday 12-1 okay? Who can consistently open, snack ideas?

Meeting Logistics and Room Booking

- - @Kendall proposed using the room 11:30am-12:30pm for faculty lunch, then shifting the meeting to 12:30-1:30pm. This timing conflicts with Rashawn's classical mechanics class
- - Alternative discussed: moving to Thursday, which works better for Rashawn's schedule (only has a lecture at 2pm) Thursday 12:30-2:30pm doesn't work for Mark
- - Rashawn could potentially set up before office hours (10:20-11:40 class, then 12:30-2:30 office hours)
- - Brenda can open the room if needed
-
- ### Snacks
- - Snacks are available in @Kendall's office with the door unlocked for easy access
- - Kirsten will handle refilling the snacks
-
- ### Professional Development Events
- - Planning career-focused panels featuring graduate students from different trajectories (industry, government, academia). Plan for March or April speakers.
- - @Kendall has two specific speakers lined up:
- - Felix: radiation physicist from Wayne State with master's in radiation physics
- - Industry speaker who previously gave a well-attended talk at FRIB
- - Events can potentially be scheduled in conjunction with the new lunch time
- - Graduate application cycle events should be planned for September (next semester), as most applications are due now or in late February
- - Undergrad series concept: covering courses, grad school preparation, application process advice from current grad students and advisors
- - Graduate application fee waivers: people can request these as needed from MSU anyway, though external speakers may not always be able to offer them
-
- ### Food and Budget
- - Organization has an event budget controlled by Mark
- - @Kendall offered to provide food for events, welcome a sense of scale to not overbuy.
- - Officers can coordinate with Brenda to order food once they have the budget code
- - Previous movie event had pizza, snacks, and popcorn
-

- ### Movie Night Planning
- - Scheduled for February (specific date TBD)
- - Planning to show Hidden Figures (127 minutes) Rashawn has access to the movie.
- - FRIB access and supervision required (not necessarily advisor presence)
- - Need to request FRIB door access two weeks in advance
- - Preferred timing: 3pm start, avoiding Fridays
- - Monday, Tuesday, or Thursday at 3pm would work for Rashawn
- - Should ask for RSVPs to ensure adequate food (ran out or came close last time)
- - Pizza worked well for previous movie night
-
- ### Other Updates
-
- - @Kendall will be in Japan for the next two weeks
- - Rashawn received a return offer from Berkeley
- - Previous professional development events were well-attended and received positive feedback
-
- ### Action Items
-
- - [ ] Team to coordinate with Mark about event budget
- - [ ] @Kendall to schedule radiation physicist and industry speakers for March/April
- - [ ] Team to send when2meet to finalize movie night date in February
- - [ ] Team to email FRIB about supervision requirements for movie night
- - [ ] Team to request FRIB access two weeks before movie night
- - [ ] Finalize weekly meeting day and time (Thursday or Friday) once Mark's availability is confirmed

NSBP 260126 Officer meeting

- Confirm Monday, February 23rd for movie night, 5:30-8?
  - Cancel meeting that day unless necessary not to?
  - Keontré will email grad org collective about this once we confirm
  - Need to advertise. Flyers? RSVP link soon to know how much pizza and such to get
    - Plates, cups, pizza, drinks, snacks?
    - Rashawn said he would handle making the flyers
    - He said Brenda is who we should talk to about printing them (3rd floor BPS)
      - Think about putting them in BPS, FRIB, maybe STEM
  - Are we certain on supervision requirements
    - Mark will ask Paul or mrs. gueye about this
- When Kendall gets back get an update on March/April speakers

    - Need to think about grad students who will be on panel for one career-focused panels featuring graduate students from different trajectories (industry, government, academia
        - I will send out a google form to the physics grad organization collective about this. Ask if they're willing to do the panel, what their track is, what branch of physics, etc.
- Tentatively do crafting event prior to finals?
    - Second to last week of

- Dr. Reinhardt with CERN & Atlas were looking for people that want to be speakers at MSU at a symposium, Rashawn mentioned that we should try to access this list of people that are coming and ask them if they'd be willing to do something in addition, like a lunch, sidebar type gig. Would also be a good idea if we could pool from the greater NSBP organization to bring a speaker ourselves to the symposium, and this would give us a good opportunity and more leverage to have our own side event with them

- Connect with uMich chapter

    - Also with OSU (I can reach out to dennis about this)
    -

- MSU SPS chapter once a semester (year?) takes a group of people to a national lab, we should think of doing something similar.
    - MSU definitely has rentable vans, Rashawn will ask SPS about that
    - Argon?
    - Fermi?
- Reach out to Khadim

260202

- Kendall, Updates on speakers
    - No updates yet for speakers, but Kendall is back!
    - Professional development: For FRIB speaker, repeat industry track talk, Need Rachel or someone for doors
        - Felix getting masters, radiation talk, could be good.

- Movie night updates Keontre emailed other orgs, they said they could bring snacks and to talk about it as we get closer
    - Flyers? Rashawn said he would get this to us for review by thursday
    - Anything else (budget? FRIB supervision updates?)

- Keontré reached out to Khadim, and he said he will step down as secretary
    - Need to find a new secretary.
- Keontré reached out to OSU NSHP/NSBP member Dennis Calderon about potentially doing something with OSU, MSU, uM
    - Not heard back yet

- Keontré still needs to make google form about people wanting to be on panel in the future for different job tracks, as well as admissions and applying to grad school stuff

- Does Rashawn have anything back from talking to SPS about potentially shuttling to a national lab?

    - Rashawn will contact again but no response so far
    - (brian could get us into fermi)
    - (look for someone for argon)

260209

- Movie night
    - Last time spent less than 200$ Rachel will check the budget from what we got last year
    - See who signs up first and then determine how much to get from that.
    - Check in with Rachel to see exactly what she has and then what else we need once we get more RSVPs.

    - Paul will supervise at FRIB, and if he cant then Rachel said Pablo would do it.
    - Public mode request has been approved, room is reserved.
    - May need to deliver pizza, deliver by 5pm. Maybe try to get there by 4:45 or at least just before 5

- Weekly demos
    - Cloud chamber
    - Magnet inside of coils, rotate it and through induction generate charge, maybe use it to charge something up?

260216

- Movie night
    - Need to print and distribute flyers asap
    - Rashawn sending email to Brenda
    - Keontré needs to contact alex about snacks from wamps
    - Keontré should post flyer in grad list discord
    - Get there at 4:45
- Fermilab trip
    - Separately look into Saturday morning physics
        - Weekly Saturday workshops for a 8 week program stemming from Fermilab
        - Could modify this to be more topical, try to expose them to different branches and worlds of physics, as well as what it's like to do research
        - Should talk to Zach
            - Try to get around 20-ish students, build some sort of registry to get a consistent group
            - May want to ask him how to go about general marketing
    - 2-day or 1-day?
        - If we do 2 days we could maybe do additional tours. UChicago, UIC (good idea, we should contact Thomas Searles)?
    - Potential dates? Time of year?
        - First day of Fall break perhaps
- Rashawn reaching out to graduate department directors in regards to undergraduate series

        - Has spoken to people at MIT and UC Berkeley,
    - Rashawn wondering about finding a decent quality camera
        - Interested for outreach purposes
        - Go-pro, high quality video,
        - Mark may have one, canon rebel t4i

260309

- Introduce Maya as secretary!
- Movie night recap
    - 12-14 ish people, went well! Not really any hiccups
    - Plan to do one in the upcoming fall? Maybe pre-emptively think of movies for this
- Any updates on speakers from Kendall?
- How are lunches going?
- Fermilab trip
    - Start focusing in on Fall break 2026, staying 2 days 1 night,
        - Possible plan: Leave day 1 in the early afternoon, (have people get lunch on their own beforehand?) go to Chicago, get dinner as a group, could think about doing some stuff in Chicago, then go to hotel for the night (probably should reach out to same hotel as SPS to get discount). Schedule 4-hour tour for second day. What we get up to and when we head back this day is heavily dependent on when we schedule this tour, need to talk about this. Can possibly plan to do something else in Chicago, hotel will hopefully have breakfast, we can get lunch together, and maybe dinner.
        - Should start trying to think about budgeting what we can here soon, and thinking about how/who we should market this to the department (starting with NSBP of course). Max is 40 people if I recall correctly.
    - Any word on process for renting vans, costs?
    - What else should we get up to in Chicago?
        - Shedd aquarium?
        - Museums?
        - Landmarks? (Wrigley, downtown, the bean, other ideas?)

- Should probably do a general meeting soon just to see who shows up? Also in general should we think about doing more recruiting or just focusing on planning for now?
- Has Zach gotten back to us about how we should go about marketing for a potential weekly physics workshop with local (high-school?) students?
- Undergraduate series
    - Updates on this from Rashawn? Has he heard back from MIT and UC Berkeley
-
